

INTEROPERABILITY AND INTEGRATION CONSULTING

Exchanging healthcare data *when, where and how* you need it.

Orchestrate Healthcare is probably the premier integrator in the healthcare technology space. They have a really strong team of specialists who really know what they are doing, and they are easy to work with. I have been very pleased with the hands-on leadership that Orchestrate Healthcare has offered, and they will be the firm that we have on speed dial for any of our third-party integration work.”

INTEROPERABILITY
AND INTEGRATION

We Deliver the Healthcare Interoperability You Need Today

For over a decade, our team of experienced interoperability and integration professionals has supported organizations of all types and sizes by developing solutions for complex interoperability challenges. We are experts at:

- Supporting environments with rapidly evolving technology and changing needs
- Migrating and aggregating data from a broad array of solutions (regardless of vintage, complexity or brand) via any interoperability framework format including **X12**, **CCDA**, **HL7 V2.x**, and **FHIR**
- Taking data from disparate healthcare records, and normalizing the data into a structured and standardized format
- Making standardized data available, discoverable, understandable and actionable for automated processes and analytics purposes
- Ensuring data generated by one system will be meaningful and usable by other systems based on different technologies
- Connecting healthcare applications to enable the continuous flow of patient data between resident systems and devices, and to external Health Information Exchange partners
- Leading projects from start to finish, or augmenting our customers' integration teams

Comprehensive Interoperability Expertise

While many vendors focus on a single solution or class of solutions, Orchestrate Healthcare possesses a depth of system-agnostic experience that enables us to understand the requirements for multiple solutions in order to improve healthcare processes and drive results. Our interoperability and integration professionals are true experts. On average, our consultants possess eighteen years of experience and they have mastered a variety of solutions including:

Infor Cloverleaf

Epic Bridges

NextGen Mirth Connect

Orion Health

- Rhapsody
- Amadeus

InterSystems

- InterSystems Healthshare
 - Health Connect
 - Patient Index
 - Info Exchange
 - Personal Community
 - Health Insight

Corepoint Health

- Integration Engine
- Community Exchange

Cerner

- CareAware
- OPENLink
- Open Engine

Improved Outcomes through Tailored Approach

Through many, many successful interoperability and integration projects and years of experience, Orchestrate Healthcare has developed a robust, yet dynamic, **Interoperability Process**. We will tailor this Process to meet your organization's unique and specific needs and to comply with your rules and standards. Unlike others who install security-lax pre-set rules and boxed routines, we develop custom solutions that:

- Eliminate unforgiving middleware
- Are easier to understand and maintain after project completion
- Provide results that work today and into the future

About Us

Orchestrate Healthcare delivers the outcomes healthcare organizations need. We are a multi-year Best in KLAS – Technical Services awarded healthcare consulting firm specializing in four core competencies: EMR Consulting Services, Interoperability and Integration Consulting, Information Security Consulting, and Activation & Go-Live Support.
